## Quality Management Systems for food processing and Traceability in Africa.

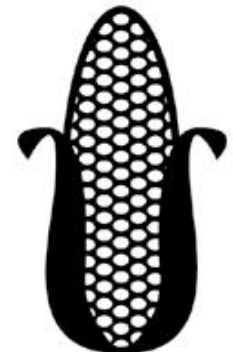

15 years experience with partners in Uganda, Pakistan, Tanzania, Burkina Faso, Malawi, Ghana Afghanistan and the UK.

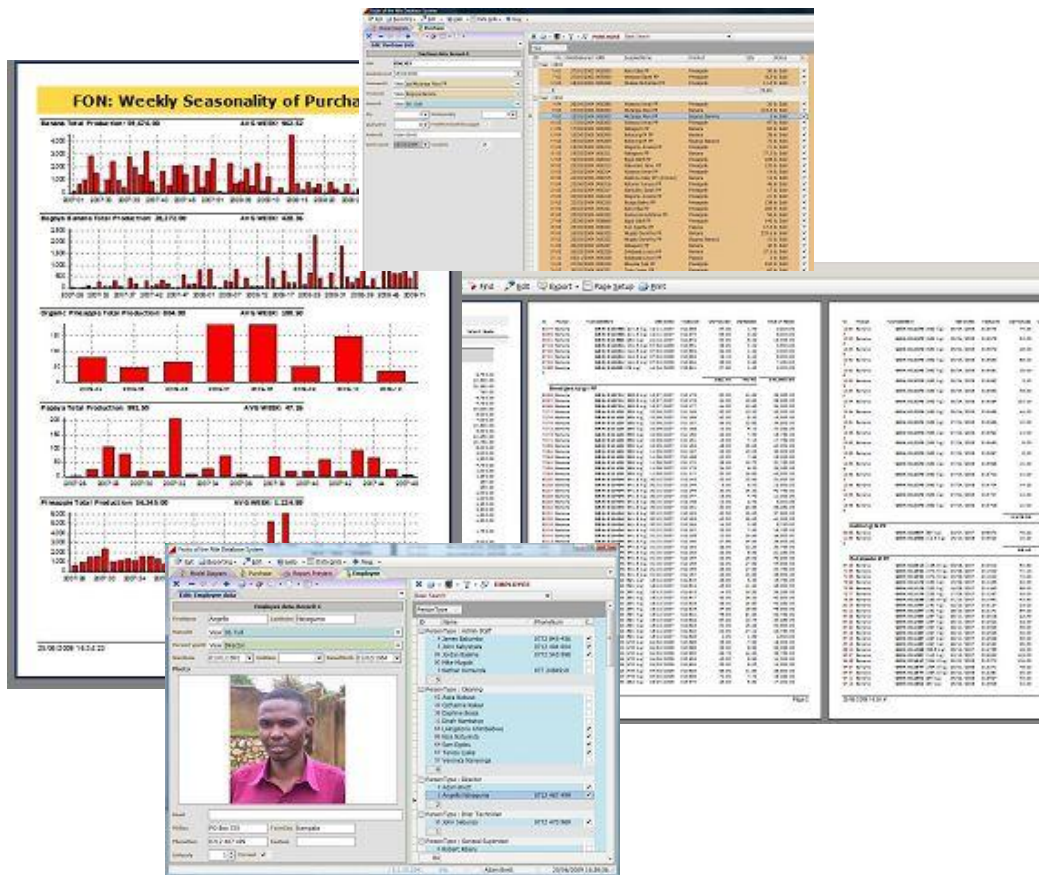

Robust and reliable in situations with poor power infrastructure.

Work with Open Source technologies to provide end user systems with zero per-seat licensing costs, but high levels of functionality.

Rapid Development skills to create bespoke applications to client needs.

In house capabilities around HACCP, BRC, Organic and Fairtrade standards to manage these requirements.

Bespoke database solutions built for partners, and tailored to their particular requirements.

Allowing partners to monitor harvests, farmer operations, staff training and business financial indicators effectively.

Opportunity for clients to learn from other businesses using our systems.

Simple GUI presentations which can be understood and used by users with little computer experience.

Powerful reporting capable of the widest ranges of OLAP, graphical and paper data output.
